

Perimeter

R 11-10

The **perimeter** is the distance around something. You can find the perimeter by adding the lengths of the sides.

Add the units on each side to find the perimeter.

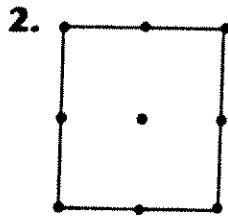

$$\begin{array}{ccccccc} \text{Side A} & \text{Side B} & \text{Side C} & \text{Side D} & & & \\ 2 & + & 4 & + & 2 & + & 4 & = & 12 \end{array}$$

The perimeter is 12 units.

Find each perimeter.

$$3 + 1 + 3 + 1 = \underline{\hspace{2cm}}$$

$$2 + 2 + 2 + 2 = \underline{\hspace{2cm}}$$
