

WHAT'S MY LINE?

Try to identify and name each kind of line described below.

A.
I am part of a line that has two endpoints.

B.
The two of us meet and cross each other.

E.
I extend in opposite directions without end.

C.
When I meet another line, it is always at a right angle.

F.
I am made of two rays that have the same endpoint.

D.
I'm a part of a line that has an endpoint at only one end.

G.
We are lines in the same plane, but we've never met.
