

### EXPANDED NOTATION

Place a single digit in each blank to make the statement true.  
Refer to the chart below.

$10^4 = 10,000$	$10^3 = 1,000$	$10^2 = 100$	$10^1 = 10$
-----------------	----------------	--------------	-------------

**Example**

$$(\underline{1} \times 10^4) + (\underline{2} \times 10^3) + (\underline{0} \times 10^2) + (\underline{9} \times 10^1) + \underline{5} = 12,095$$

**C-113**

$$(\underline{\quad} \times 10^4) + (\underline{\quad} \times 10^3) + (\underline{\quad} \times 10^2) + (\underline{\quad} \times 10^1) + \underline{\quad} = 9,880$$

**C-114**

$$(\underline{\quad} \times 10^4) + (\underline{\quad} \times 10^3) + (\underline{\quad} \times 10^2) + (\underline{\quad} \times 10^1) + \underline{\quad} = 10,100$$

**C-115**

$$(\underline{\quad} \times 10^4) + (\underline{\quad} \times 10^3) + (\underline{\quad} \times 10^2) + (\underline{\quad} \times 10^1) + \underline{\quad} = 798$$

**C-116**

$$(\underline{\quad} \times 10^4) + (\underline{\quad} \times 10^3) + (\underline{\quad} \times 10^2) + (\underline{\quad} \times 10^1) + \underline{\quad} = 7,980$$

**C-117**

$$(\underline{\quad} \times 10^4) + (\underline{\quad} \times 10^3) + (\underline{\quad} \times 10^2) + (\underline{\quad} \times 10^1) + \underline{\quad} = 1,010$$
