

1.11 ENRICHMENT

Rounding Greater Numbers

Round the number of pennies in the jars to find out who won each jar. Match each guess in the box with the correct jar of pennies. Write the person's name under the jar he or she won.

Eva's guess: about 6000 pennies	Yoko's guess: about 10,000 pennies
Brad's guess: about 9000 pennies	Rita's guess: about 1000 pennies
Roy's guess: about 7000 pennies	Mark's guess: about 900 pennies
Kim's guess: about 8000 pennies	Jane's guess: about 4000 pennies
Andy's guess: about 3000 pennies	Stan's guess: about 5000 pennies

Here are three more jars of pennies. Label the jars with exact amounts that could have been prizes for any two of the winners listed above. Have a friend write the name of the person who could have won each jar.
